

Advertising auto pay station with parking flap solutions

Automated payment machine, or can also be called auto pay station, pay on foot station, or pay and display machine, is set up on the way to parking lot exit or other proper location.

- It offers self-service of parking fee collection to drivers.
- It also provides automatic, humanized and safety management to parking lot

On each side of the auto pay station, there is 19" advertising screen. The parking lot manager can gain revenue from the 24 hours non-stop broadcasting advertising. Also it can be put in open small parking lot, working with parking flap barrier for unattended management, which can save labor cost a lot.

Characteristic

Distance Control by Internet

The parking meter is connected with Internet. The administrator can control the machine in his office. He can set or change all the parameters of the machine in his computer, and get all the statistical data of the machine and all kinds of reports in his management software.

Maintenance

Each module is independent, if one module cannot work, it will not affect other modules' working. Just replace it with a new one, and the replacement is easy.

Damage Alarm

The machine has infrared sensor. When someone breaks it, it will immediately alarm loudly and give an alarm signal to management center.

Malfunction Alarm

The machine can do self-test / self-checking. When one module cannot work, it will send a exact malfunction alarm to center, And the administrator can know which module does not work.

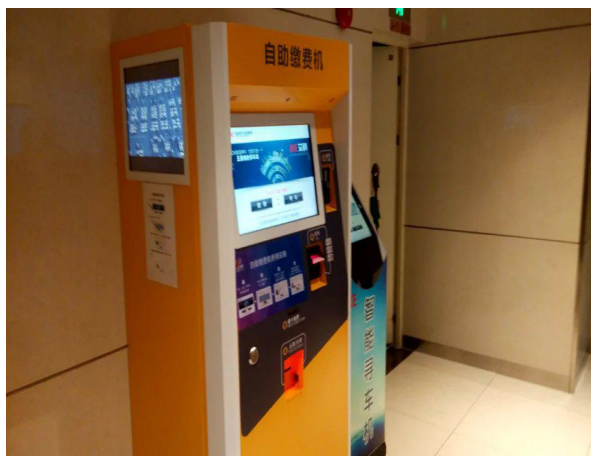

Warranty

The warranty of each functional module is 1 year.

Technical parameter

Size:	L*W*H 660*660*1800MM
Case material	A3 steel,T-2.5MM
Case appearance treatment	Imported paint baking
Weight	130KG
Data storage capacity	8G
Card reading distance	5-10cm
Communication interface:	TCP/IP
IP	IP54
Voltage	110V/220V AC 50HZ
Power	120W
Working temperature	-20°C- +60°C
Software language	English
